CONTENTS OF VOLUME 86

NUMBER 1—SEPTEMBER 1995

X-ray and neutron powder diffraction from $Rb_3C_{60}(NH_3)_x$ and $Li_3C_{60}(NH_3)_x$
By R. Durand, W. K. Fullagar, G. Lindsell, P. A. Reynolds and J. W. White ... 1

Inelastic neutron scattering and superconductivity of $Rb_3C_{60}(NH_3)_x$
By C. J. Carlile, R. Durand, W. K. Fullagar, P. A. Reynolds, F. Trouw and J. W. White ... 19

Rotational relaxation and collisional energy transfer. Calculations based on a new fitting law
By Mikhail L. Strekalov ... 39

Density profiles of chemically reacting fluids in slit-like pores. Integral equation approach
By A. Trokhymchuk, O. Pizio, S. Sokołowski and D. Henderson ... 53

Configurational statistics for isolated square-well chain molecules: exact results for short chains
By Mark P. Taylor ... 73

Structural investigation of liquid formic acid. X-ray and neutron diffraction, and reverse Monte Carlo study
By P. Jedlovszky, I. Bakó, G. Pálinkás and J. C. Dore ... 87

The direct *l*-type resonance spectrum of $CF_3^{35}Cl$ in its vibrational state $v_6 = 1$
By Hauke Harder, Helmut Dreizler and Dušan Papoušek ... 107

A direct method for determination of chemical potential with molecular dynamics simulations. Part 2. Mixtures
By Richard L. Rowley, Matthew W. Schuck and John C. Perry ... 125

Molecular simulation in a pseudo grand canonical ensemble
By Manoj Mehta and David A. Kofke ... 139

Research Note

Parameterizing a polarizable intermolecular potential for water
By John Brodholt, Marco Sampoli and Renzo Vallauri ... 149

NUMBER 2—10 OCTOBER 1995

Third-order theory of forced 4f → 5d two-photon transitions
By L. Smentek ... 159

Parallel Gibbs-ensemble simulations
By L. D. J. C. Loyens, B. Smit and K. Esselink ... 171

Group theoretical classification of resonance states of mixed valence polynuclear clusters
By V. P. Coropceanu, M. E. Guerrero and V. IA. Gamurari ... 185

Motion of the water molecules and phase transitions in $Sr[Fe(CN)_5NO]*4H_2O$ studied by proton NMR
By J. Tritt-Goc ... 193

Microstructure and phase behaviour of a mixed-dimer amphiphile
By D. R. Kuespert, V. Muralidharan and M. D. Donohue ... 201

Determination of excess Gibbs free energy of quantum mixtures by path integral Monte Carlo simulations
By A. Liu and T. L. Beck ... 225

CONTENTS OF VOLUME 86

^{19}F nuclear magnetic shielding tensor of CH_3F
By T. Enevoldsen and J. Oddershede 235

C—NO_2 dissociation energies and surface electrostatic potential maxima in relation to the impact sensitivities of some nitroheterocyclic molecules
By P. Politzer and J. S. Murray 251

A study of classical and quantum dynamics of protons in polycrystalline 2,5-dinitrobenzoic acid
By W. Medycki and S. Idziak 257

A molecular dynamics study of heavy water steam
By J. Martí, J. A. Padró and E. Guàrdia 263

The NO dimer: ^{15}N isotopic infrared spectra, line-widths, and force field
By A. R. W. McKellar, J. K. G. Watson and B. J. Howard 273

Measurement of speed dependent rotational relaxation rates using a microwave spectrometer with a circular waveguide. Studies on nitrous oxide
By T. Köhler and H. Mäder 287

A simple formalism for the analysis of NMR in the presence of exchange
By M. Goldman 301

On the importance of core polarization in heavy post-d elements: a pseudopotential calibration study for X_2H_6 (X = Si, Ge, Sn, Pb)
By A. Nicklass and H. Stoll 317

NUMBER 3—20 OCTOBER 1995

***Trans*-stilbene in methanol solution. On the effect of flexible atomic charges in computer simulations**
By A. Laaksonen, J. Wang and R. J. Boyd 327

Analysis of homonuclear RF gradient NMR spectroscopy
By Y. Zhang, W. E. Maas and D. G. Cory 347

Spectroscopic properties for the $^1\Sigma^+$ ground state of AuCl. A scalar relativistic coupled cluster study
By P. Schwerdtfeger 359

Quantum chemical studies of the solvation of the hydroxide ion
By A. R. Grimm, G. B. Bacskay and A. D. J. Haymet 369

Calculation of free energy for molecular crystals by thermodynamic integration
By L. A. Báez and P. Clancy 385

Structure and properties of fractional charge molecular systems: quark molecular hydrogen ions
By I. Cacelli and A. Rizzo 397

Associating fluids with four bonding sites against solid surfaces: Monte Carlo simulations
By C. J. Segura and W. G. Chapman 415

First-order Coulomb interaction energies for atoms and diatomic molecules
By R. J. Wheatley 443

Stability of the nematic phase for the hard ellipsoid fluid
By M. P. Allen and C. P. Mason 467

Application of superspace symmetry to optical and magnetic resonance spectra of incommensurably modulated crystals
By G. Zwanenburg and E. De Boer 475

Intermolecular force field and approximate equilibrium structure of various complexes containing one or two rare gas atoms from microwave spectroscopic constants
By R. P. A. Bettens, R. M. Spycher and A. Bauder 487

New bands of the MgO $A^1\Pi$–$X^1\Sigma^+$ and $a^3\Pi_{0,1}$–$X^1\Sigma^+$ systems by Faraday laser magnetic resonance spectroscopy
By P. Mürtz, H. Thümmel, C. Pfelzer and W. Urban 513

A photophysical study of micellization of cetyltrimethylammonium bromide in urea–water binary mixtures
By C. Carnero Ruiz 535

CONTENTS OF VOLUME 86

NUMBER 4—NOVEMBER 1995

Special Issue: Douglas Henderson—A Life in Statistical Mechanics

Foreword
By GEORGE JACKSON 547

Douglas Henderson: a life in statistical mechanics
By JOHN A. BARKER 549

The misadventures of a NAFTA Scientist: physics and phun in Canada, the United States, and Mexico
By DOUGLAS HENDERSON 551

Simulation of self-assembly and lyotropic liquid crystal phases in model discotic solutions
By RICHARD G. EDWARDS, J. R. HENDERSON and ROBIN L. PINNING 567

Vapour–liquid equilibria in two-dimensional Lennard-Jones fluids: unperturbed and substrate-mediated films
By SHAOYI JIANG and KEITH E. GUBBINS 599

Computer modelling of the 4-n-alkyl-4′-cyanobiphenyls adsorbed on graphite: energy minimizations and molecular dynamics of periodic systems
By D. J. CLEAVER, M. J. CALLAWAY, T. FORESTER, W. SMITH and D. J. TILDESLEY 613

Free energy model for the inhomogeneous hard-body fluid: application of the Gauss–Bonnet theorem
By YAAKOV ROSENFELD 637

Density profiles of a double square-well model of a chemically associating fluid near a hard wall
By OREST PIZIO, ANDRIJ TROKHYMCHUK and STEFAN SOKOLOWSKI 649

Inhomogeneous hard homonuclear molecules
By JACQUELINE QUINTANA 665

Development of periodic order in disordered surfactant–solution phases
By I. DORNIC and B. WIDOM 675

Non-equilibrium simulations
By WILLIAM G. HOOVER and OYEON KUM 685

Extended irreversible thermodynamics: an unfinished task
By L. S. GARCÍA-COLÍN 697

Ferroelectric phase transition in simple dipolar systems
By J. S. HØYE and G. STELL 707

The structure and dielectric properties of polar solvents
By W. RONALD FAWCETT 715

Micellar solutions with added salt. A Monte Carlo and modified Poisson–Boltzmann study
By M. LANZA AMARO, L. B. BHUIYAN and C. W. OUTHWAITE 725

The double layer at the interface between a simple metal and an aqueous solution
By W. SCHMICKLER and E. LEIVA 737

Non-neutrality in a charged capillary
By WAI YIN LO and KWONG-YU CHAN 745

Monte Carlo and HNC/MSA results for an asymmetrical electrolyte in an external electrical field of spherical geometry
By LÉO DEGRÈVE and MARCELO LOZADA-CASSOU 759

Fast moment methods for general potentials in molecular dynamics
By E. R. SMITH 769

Density and charge correlations in water
By A. D. TROKHYMCHUK, M. F. HOLOVKO and K. HEINZINGER 797

An analytical model of water with sticky spheres of tetrahedral symmetry
By L. BLUM and F. VERICAT 809

Excluded volume for a pair of linear chains of tangent hard spheres with an arbitrary relative orientation
By DAVE C. WILLIAMSON and GEORGE JACKSON 819

CONTENTS OF VOLUME 86

Contact force between hard spheres immersed in a sticky hard sphere solvent
By J. N. HERRERA-PACHECO and J. F. ROJAS-RODRÍGUEZ 837

Phase-stability lines, spinodals and distribution functions for binary immiscible mixtures
By S. TOXVAERD and E. VELASCO 845

Structure of variable-width square-well fluids from the reference hypernetted chain equation
By ALEJANDRO GIL-VILLEGAS, CARLOS VEGA, FERNANDO DEL RÍO and ANATOL MALIJEVSKY 857

Carbon-13 chemical shift tensors of carboxylic acids: GIAO calculations in acetic acid + methylamine dimer
By JULIO C. FACELLI, ZHENGTIAN GU and ANN MCDERMOTT 865

The near-critical microscopic viscosity of binary liquid mixtures: 2-butoxyethanol + water at the lower critical endpoint
By PATRICIA J. CLEMENTS, JAMES BOWERS, BRIAN BROCKLEHURST and IAN A. MCLURE . 873

Scaling properties of the capillary-wave model with interfacial bending rigidity
By A. ROBLEDO and C. VAREA 879

Young's law with gravity
By E. M. BLOKHUIS, Y. SHILKROT and B. WIDOM 891

Density fluctuations in random sequential adsorption based on mixing of configurational species
By HOWARD REISS and PIERRE SCHAAF 901

The usefulness of restrictions for variational ground state lower bounds of a simple quantum spin lattice
By JOEL H. SEBOLD and J. K. PERCUS 907

Cation transport in lithium sulphate based crystals
By MAURO FERRARIO, MICHAEL L. KLEIN and IAN R. MCDONALD 923

Effective pairwise potential for simulations of adsorbed platinum
By STEVEN Y. LIEM and KWONG-YU CHAN 939

Polarization interaction in relation to structure of liquid metals
By M. BLAZEJ, N. H. MARCH and F. FLORES 951

NUMBER 5—10 DECEMBER 1995

On the form of the exact quantum mechanical vibrational kinetic energy operator for penta-atomic molecules in internal coordinates
By ATTILA G. CSÁSZÁR and N. C. HANDY 959

Natural embedding of $\mathscr{A}_5 \equiv \mathscr{I}$ group in $SU(m \leqslant n) \times \mathscr{S}_{12}$ NMR spin algebras. II. Role of λ $\mathscr{S}_{12}$-module decompositions over $\{[\lambda']\}$ in determining $[^{11}B]_{12}(SU(4) \times \mathscr{S}_{12})$ aspects of $[^{11}BH]_{12}^{2-}$, $[^{11}B^2D]_{12}^{2-}$ exo-cage ions
By F. P. TEMME 981

On the polarizabilities of the doubly charged ions of group IIB
By N. C. PYPER, C. G. PIKE, P. POPELIER and P. P. EDWARDS 995

The role of three-body interactions in the adsorption of argon in silicalite-1
By FÉLIX FERNÁNDEZ-ALONSO, ROLAND J.-M. PELLENQ and DAVID NICHOLSON 1021

Calculation of shielded Coulomb potential in a mixture of multipoles
By BEDAMATI DAS and PINAKI GUPTA-BHAYA 1031

Study of slow molecular motions in solution using off-resonance irradiation in homonuclear NMR. I. Long dipolar correlation times
By HERVÉ DESVAUX, CLAIRE WARY, NICOLAOS BIRLIRAKIS and PATRICK BERTHAULT ... 1049

Study of slow molecular motions in solution using off-resonance irradiation in homonuclear NMR. II. Fast chemical exchange processes
By HERVÉ DESVAUX, NICOLAOS BIRLIRAKIS, CLAIRE WARY and PATRICK BERTHAULT ... 1059

The structure of the V centre produced by KrCl excimer laser irradiation of KI crystals at low temperatures
By TAKEYUKI OKADA 1075

CONTENTS OF VOLUME 86

Double-exchange interactions in the mixed-valence hexanuclear octahedral clusters $[Fe_6(\mu_3 - X)_8(PEt_3)_6]^+$ (X = S, Se)
By Alessandro Bencini, Andrew V. Palii, Sergei M. Ostrovsky, Boris S. Tsukerblat and Myriam G. Uytterhoeven 1085

Molecular orientational motion in PCH5: computer simulations and models
By S. Ye. Yakovenko, A. A. Muravski, G. Krömer and A. Geiger 1099

Correlation functions of hard-sphere chain mixtures: integral equation theory and simulation results
By R. O'Lenick, X. J. Li and Y. C. Chiew 1123

Water proton relaxation studies of air–water distributions in beds of randomly packed monodisperse glass microspheres
By J. E. M. Snaar and B. P. Hills 1137

Linear dependence on chain length for the thermodynamic properties of tangent hard-sphere chains
By Yaoqi Zhou, Steven W. Smith and Carol K. Hall 1157

Application of the rotation operator approach to selective excitation of coupled spin systems by a shaped radiofrequency pulse
By Jinyuan Zhou, Liyun Li and Chaohui Ye 1173

An *ab initio* study of the excited states of the molecular ions NF^+ and PCl^+
By Gap-Sue Kim and David M. Hirst 1183

Formalized quantum mechanical Floquet theory and its application to sample spinning in nuclear magnetic resonance
By T. O. Levante, M. Baldus, B. H. Meier and R. R. Ernst 1195

Stark effect of the 15V 31 344·9 band of CS_2 studied by sub-Doppler high-resolution spectroscopy
By Masaya Ohtsuka, Kazutoshi Okada, Hajime Katô and Masaaki Baba 1213

Scaling properties of correlation energies of homonuclear diatoms
By A. Grassi, G. M. Lombardo, N. H. March and R. Pucci 1229

Observation of strong Coriolis coupling in the infrared spectrum of Ar–CO
By S. König, G. Hilpert and M. Havenith 1233

Vibrational quantum beats observed by Raman-induced optical Kerr effect
By Tzer-Hsiang Huang and Chin-Hsien Wang 1249

Adiabatic transfer of net electron polarization to nuclear polarization
By N. N. Lukzen and U. E. Steiner 1271

Rotational state selectivity in $N_2^+ X\,^2\Sigma_g^+$ ($v^+ = 0$) by delayed pulsed field ionization spectroscopy via the $a''\,^1\Sigma_g^+$ ($v' = 0$) state
By S. R. Mackenzie, F. Merkt, E. J. Halse and T. P. Softley 1283

Research Note

The rotational partition function of diatomic molecules
By G. P. Arrighini and C. Guidotti 1299

NUMBER 6—20 DECEMBER 1995

Preliminary communication
Self-diffusion in strongly driven flows: a non-equilibrium molecular dynamics study
By András Baranyai and Peter T. Cummings 1307

A comparison of finite basis set and finite difference Hartree–Fock calculations for the BF, AlF and GaF molecules
By J. Kobus, D. Moncrieff and S. Wilson 1315

Spectroscopic constants and potential energy surfaces for the possible interstellar molecules AlNC and AlCN
By Buyong Ma, Yukio Yamaguchi and Henry F. Schaefer III 1331

The structure of an associating hard core Yukawa fluid near a hard wall
By A. Trokhymchuk, D. Henderson and S. Sokołowski 1339

CONTENTS OF VOLUME 86

Landau free energy, Landau entropy, phase transitions and limits of metastability in an analytical model with a variable number of degrees of freedom
By R. M. Lynden-Bell 1353

Persistence time for bonds in a tetravalent network fluid
By Robin J. Speedy and Pablo G. Debenedetti 1375

Equation of state for two-dimensional fluids with hard cyclic *n*-mer molecules
By M. J. Maeso and J. R. Solana 1387

Hypernetted chain calculation of static correlation function of macroions in solution using Allnatt equation
By Bedamati Das and Pinaki Gupta-Bhaya 1397

Bond-number distribution of a solute molecule in the hard-sphere fluid
By Y. Yoshimura 1419

Basis set convergence and performance of density functional theory including exact exchange contributions for geometries and harmonic frequencies
By Jan M. L. Martin, Jamal El-Yazal and Jean-Pierre François 1437

Equation of state for the square-well chain fluid based on the dimer version of Wertheim's perturbation theory
By Frederico W. Tavares, Jaeeon Chang and Stanley I. Sandler 1451

Osmosis and reverse osmosis in solutions: Monte Carlo simulations and van der Waals one-fluid theory
By S. Murad, J. G. Powles and B. Holtz 1473

Exact results for isolated sticky chains
By Yaoqi Zhou, Carol K. Hall and George Stell 1485

Integral equation theory for the electrode–electrolyte interface with the central force water model. Results for an aqueous solution of sodium chloride
By M. Vossen and F. Forstmann 1493

Use of computer algebra for the study of quadrupole spin systems
By D. J. Isbister, Mangala S. Krishnan and B. C. Sanctuary 1517

Research Note

A model nematic liquid crystal revisited: some new phase diagrams from density-functional theory
By P. I. C. Teixeira and M. M. Telo Da Gama 1537

Erratum

The properties of inhomogeneous square-well mixtures in one dimension
By P. A. Monson 1545

Index of Authors (with the titles of papers) 1547
